

DR. D.A. PERLEY ELEMENTARY SCHOOL

2021-2022 Growth Plan Overview

Who We Are

The Perley school community is diverse and strives to be meaningfully inclusive of all members. We are a family school that focuses on building connections between all members of our community. Spending time together outside each day with our Moving in the Morning program, buddy programs, and special events help to weave the fabric of community throughout our building.

Our Learners

Our learners are living in a complex world and arrive at school carrying a lot on their minds. They are not always able to regulate their emotions in order to focus on learning. While most of our learners identify feeling connected to at least one adult at school, they don't always feel a sense of ownership or power about what happens here. They are looking for opportunities to lead!

Our Goals

Students will know and apply at least one strategy to help regulate their emotions (breathing practices, asking for a break, squeeze & release etc.)

Students will see themselves as leaders and active participants in the day-to-day at Perley

We see these goals as having implications in three main areas (Social Emotional Learning, Academics, and Career Education). When someone can regulate their emotions and knows their own power, they are able to learn, have meaningful relationships, and be successful in a workplace.
